*10 YEAR WARRANTY Materials & Workmanship

*2 YEAR WARRANTY Wearing Components

REWINDA

May 2025

The new Alemlube AR1220CAR Rewinda Compressed Air Hose Reel is an industrial quality hose storage & retrieval system featuring Gen3 hybrid polymer hose and hose bend restrictors to ensure a long service life for your hose assemblies.

Suitable for use in mine sites, automotive, transport, manufacturing, agricultural & civil contractor workshops this compressed air hose reel is ideal for use with tyre gauges, pneumatic drills, impact wrenches, angle grinders & ratchets.

The Rewinda range has been researched, designed and engineered in conjunction with our long-standing, industry leading plastic covered hose reel partner, with the result being an exciting range of innovative, safe, ergonomic, durable and aesthetically pleasing hose reels.

Replacing the S Series as released in 2008, this new versatile & complete range meets market needs and is set to exceed industry expectations.

The patented speed rewind control system, included on all models, ensures that the hose retracts at a safe and steady speed, resulting in a safe operating environment, minimising the chance of damage to workshop equipment, and in some instances, customers' vehicles.

The unique, and also patented, stop-at-any-point latching system secures the hose at the exact desired length each and every time. The sliding guide system ensures that the hose returns neatly and evenly onto the barrel assembly, and the next level UV stabilised covers won't fade over time.

A new fully serviceable modern design includes updated mounting brackets that can be used with the Alemlube S Series hose reels & other leading brands.

With a 10 year warranty on materials and workmanship and a no exclusions 2 year warranty on wearing parts such as o'rings, seals, hose assemblies, springs and bushes, the new Rewinda Series of hose reels is set to be the new on-point hose storage and retrieval solution in mining, construction, agriculture, transport and automotive sectors in Australia, New Zealand and Papua New Guinea.

SPECIFICATIONS, FEATURES & BENEFITS

- Gen3 hybrid polymer hose & hose bend restrictors ensure a long service life for your hose assemblies
- High grade impact resistant UV stabilised covers won't fade over time
- Patented speed rewind control system ensures that the hose retracts at a safe & steady speed with speed control brake system
- Patented stop-at-any-point latching system secures the hose at the exact desired length every time
- Sliding guide system ensures that the hose returns neatly & evenly on to the barrel assembly
- Detachable steel mounting bracket enables 180° hose reel rotation & fits other leading brands
- 20m x 12mm ID hose & 0.9m lead in hose
- 1/2" BSPT(m) inlet/outlet connections
- 1/2" BSPT(f) hose reel inlet thread
- Maximum working pressure of 300 psi (20 bar)
- Working temperature of -40°C to +80°C
- Weight of 14kg
