WELD CLEANING

WELD BRUSH COMPATIBLE SOLUTIONS

CHEMTIG™ ACID-BASED WELD CLEANING SOLUTION

One step cleaning and passivation.

Removes discoloration, tea staining, light surface oxides, and rust from recently welded stainless steel.

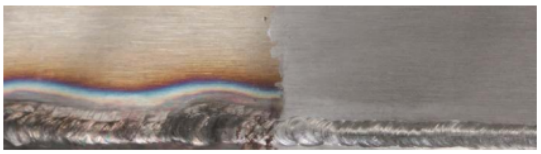

Fast acting. Easy rinse off.

Great alternative to pickling paste.

Cleans and polishes metal welds with ease.

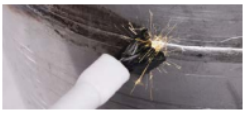

☑ NON-FLAMMABLE FORMULA

Now specially formulated for more demanding applications.

USE IN CONJUNCTION WITH ALL BRANDS OF WELD BRUSH CLEANERS

PART NO.	SIZE
CT-25-STD-1L	1 Litre
CT-25-STD-5L	5 Litres
CT-25-STD-20L	20 Litres

ACID TREATMENTS

CORROFIX™ NEUTRALISER FOR ACIDIC TREATMENTS

Concentrated alkaline solution. **Specially formulated to neutralise acidic pickling waste or other acid deposits.** Rinses off easily with water.

Suitable for use on stainless steel welds and other metals.

☑ Contains an inbuilt pH indicator for visual colour change when neutralisation has been completed.

PART NO.	SIZE
CT-SSN-5L	5 Litres
CT-SSN-20L	20 Litres

EQUIPMENT MAINTENANCE

WELD TORCH PROTECTION

CHEMTIG™ WELD TORCH COOLANT

Non-hazardous, corrosion inhibiting liquid. Stable, low viscosity formula. Improves weld quality, speed, and productivity.

Protects torch heads and internal cooling system parts such as pumps, valves, and pipework. Ensures parts remain in high working order.

Compatible with all high performance welding equipment. Will not damage metals or plastics.

TIP • With regular use, internal mineral deposit build-up during operation will be eliminated entirely. Consistant use extends time between preventative maintenance schedules. It will also reduce electric consumption.
