TIGMASTER®

TIG FINGER

The Tig Finger is great for:

- Tig welding aluminium castings that get really hot
- Pipe welding with tig especially small bore stainless steel pipe
- The Tig Finger heatshield is even good for propping against the metal when you use a cutting torch.

Part Number	Description
TF	Tig Finger
TFXL	Tig Finger XL (covers 2 fingers)

AFTF	Arcforce single finger

The Tig Finger Heat Shield lets you prop right next to
your weld as it slides along smoothly.
With a Tig Finger, you wont have to sacrifice burned fingers.
It is made from a really smooth heat resistant material.
